- Continuous coating, with no expansion joints
- Highly flexible, durable and resistant to cracking
- Can be applied to existing flooring and walls
- Low thickness (3-4 mm)
- Stone effect
- Easy to clean
- Waterproof
- Wide range of colours
- Easy to apply
- Suitable for radiant floors

Micro Lime Plus es un revestimiento continuo a base de cal NHL, áridos seleccionados de grano fino y resinas de alta resistencia y flexibilidad. Está disponible en una amplia gama de colores, resistentes a los rayos UV y puede aplicarse sobre múltiples superficies, tanto interiores como exteriores. Las diferentes técnicas de aplicación permiten obtener el acabado deseado: damascato, pulido y estuco.

Micro Lime Plus is a continuous coating containing NHL lime, selected fine-grained aggregates, and highly resistant and flexible resins. It is available in a wide range of UV-resistant colours and can be applied to many surfaces, both indoors and outdoors. Using different techniques for its application will give the desired finish: damask effect, polished, and stucco.
